

THE NORTHEAST-MIDWEST HOUSE COALITION

GREAT LAKES TASK FORCE

March 31, 2014

The Honorable Frank Wolf
Chairman
Subcommittee on Commerce, Justice, and
Science, and Related Agencies
H-309 The Capitol
Washington, DC 20510

The Honorable Chaka Fattah
Ranking Member
Subcommittee on Commerce, Justice,
Science, and Related Agencies
1016 Longworth House Office Building
Washington, DC 20510

Dear Chairman Wolf and Ranking Member Fattah:

As members of the Great Lakes delegation, we are writing to inform the Subcommittee that we are united in carefully monitoring programs that are integral to the Great Lakes environment and waterborne commerce. As you develop the Fiscal Year (FY) 2015 appropriations bill, we write to share our commitment to programs within the U.S. National Oceanic and Atmospheric Administration (NOAA) that protect our economic and environmental health, including fish and wildlife resources in the Great Lakes. In particular, we will carefully monitor the following programs:

- **The Great Lakes Environmental Research Laboratory** as authorized through Executive Order 11564 creating the National Oceanic and Atmospheric Administration, the Aquatic Nuisance Species Act, and the Great Lakes Water Quality Agreement;
- **Coastal Zone Management grants** as authorized through the Coastal Zone Management Act of 1972;
- **National Sea Grant** as authorized through the National Sea Grant College Program Act; and
- **The Great Lakes Observatory System** as authorized by the Integrated Ocean and Observation System Act of 2009.

The program work carried out by NOAA is of critical importance to the sustainability of the Great Lakes' natural resources. As you know, the Great Lakes are a unique natural system of global economic and environmental significance. It provides the world's largest system of fresh surface water, supplying drinking water for more than 30 million Americans; supports over 1.5 million jobs, generating \$62 billion in wages each year; and is home to over 3,500 species of plants and animals. At the same time, the Lakes have struggled with invasive species, toxic chemical contamination, habitat loss, and beach closures. The missions of the Great Lakes programs are closely and integrally linked such that one agency's programmatic activities and funding will have ramifications for other agencies' programs success.

We urge the Subcommittee to carefully review these programs and thank you for your attention to this matter. If you have questions, please contact Samuel Breene, Legislative Director of the Northeast-Midwest Congressional Coalition, at 226-6106 or samuel.breene@mail.house.gov

Sincerely,

Candice S. Miller
