The Honorable Roy Blunt, Chairman  
The Honorable Patty Murray, Ranking Member  
Committee on Appropriations  
Subcommittee on Labor, Health and Human Services, Education and Related Agencies  
United States Senate  
Washington, DC 20510

March 27, 2015

Dear Chairman Blunt and Ranking Member Murray:

We write in support of the Low Income Home Energy Assistance Program (LIHEAP) and urge you to fund this important program at no less than $4.7 billion in Fiscal Year 2016.

LIHEAP is the main federal program that helps low-income households and seniors with their energy bills, providing vital assistance during both the cold winter and hot summer months. LIHEAP assistance is an indispensable lifeline, helping to ensure that recipients do not have to choose between paying their energy bills and affording other necessities like food and medicine. Access to affordable home energy is a matter of health and safety for many low-income households, children, and seniors.

While we recognize the ongoing discretionary budget challenges, we are increasingly concerned that the number of households eligible for LIHEAP assistance continues to exceed available funding at a time when the average cost of home heating is expected to remain unaffordable for millions of households nationwide. In fact, according to the National Energy Assistance Director’s Association, the current funding level is able to serve just 20 percent of the eligible population, and those who receive LIHEAP assistance have seen their average grant reduced by nearly $100 since 2010, from $520 in FY 2010 to $424 in FY 2014. This means that the average LIHEAP grant now covers just a fraction of average home energy costs, leaving many low-income families and seniors struggling to pay for the basic necessity of home energy and having fewer resources available to meet other essential needs.

We ask that you take into account the great need for LIHEAP and the impact that cuts to the program could have on low-income families and seniors and restore LIHEAP funding to no less than $4.7 billion.

Thank you for your attention to and consideration of this important request. We look forward to continuing to work with you to support this vital program and help provide access to affordable home energy for the most vulnerable households in our states.

Sincerely,

Jack Reed
